

Neurodegenerative Disorders Research

Director: Professor Peter K Panegyres, MBBS MD PhD FRACP
Clinical Professor, The University of Western Australia

Neurodegenerative Disorders Research Pty Ltd (NDR) is pleased to announce the opening of a new clinic in Perth for patients with Huntington's disease.

The Perth Huntington's Disease Clinic

NDR has been involved in Huntington's disease clinical work and research for over ten years, including clinical trials: CREST-E, Horizon, Pride-HD, Reach-2HD, CANS.

NDR is now offering the services of its multidisciplinary team: neurologist with a special interest in neurodegenerative disorders, neurogenetics and neuropharmacology, cognitive assessors and support staff.

Patients will be managed by the multidisciplinary team under our Neurologist, Professor Peter K Panegyres, and will be reviewed as required. A referral is required from their general practitioner — no out-of-pocket expenses will be incurred with a GP referral.

Professor Panegyres has over 20 years' experience in Huntington's Disease. He has conducted his own research in:

- The significance of intermediate CAG repeat lengths;
- Juvenile Huntington's disease;
- Factors affecting the natural history of Huntington's disease; and
- Current research focusing on Huntington's disease in the elderly.
